**Pre-test Probability Worksheet**

**Instructions:** This form captures the physician's assessment of the pre-test probability that the lesion used for eligibility is lung cancer *prior to the bronchoscopy*.

For subjects that were not able to have the physician's assessment completed prior to bronchoscopy, the reason should be provided in Q1a, and the assessment should be completed using the *pre-bronchoscopy data*.

**1. Was the pre-test probability completed prior to bronchoscopy?**

- No, complete Q1a
- Yes, continue to Q2

**1a. If no, provide primary reason:**  Timing issues

- Provide response and continue to Q2*  Patient enrolled prior to form implementation (*cases 1-179 only*)  
 Other, specify \_\_\_\_\_

**2. Date of Assessment:** \_\_\_\_\_ - \_\_\_\_\_ - \_\_\_\_\_  
*MMM dd yyyy*

**3. Time of Assessment::** \_\_\_\_\_ : \_\_\_\_\_  
*HH mm*

**4. Pre-test probability (check only one):**

- Low (<10% probability that lesion is lung cancer)
- Medium (10-60% probability that lesion is lung cancer)
- High (>60% probability that lesion is lung cancer)
