Geoffrey D. Rubin, MD, MBA, FACR, FAHA, FSABI, FNASCI

Since 2020, **Geoffrey D. Rubin, MD, MBA, FACR, FAHA, FSABI, FNASCI,** has served as Professor and Chair of the Department of Medical Imaging at the University of Arizona and Service Chief of Medical Imaging at Banner University Medicine in Tucson, Arizona. He is a past President of the Fleischner Society, the Society for Advanced Body Imaging, the North American Society for Cardiovascular Imagers, and currently President and Board Chair of the International Society for Computed Tomography, Treasurer of the Association for University Radiologists, Board Member of the Radiology Leadership Institute of the American College of Radiology, Executive Board Member of the International Society for Strategic Studies in Radiology, and Board Member of RAD-AID International. He was previously the George B. Geller Distinguished Professor and Chair of Radiology at the Duke University School of Medicine.

Prior to joining Duke University in 2010, he was professor of radiology at Stanford University, where in the 1990s and early 2000s, he pioneered the development of CT angiography and three-dimensional visualization techniques across the cardiovascular system. He also served as Associate Dean for Clinical Affairs at the Stanford School of Medicine, Associate Director of the Stanford Cardiovascular Institute, and Chief of Cardiovascular Imaging within the Stanford Department of Radiology.

In 2014, he earned an MBA from the Fuqua School of Business at Duke University, where he was recognized as a Fuqua Scholar and represented his class as their commencement speaker. He is the author of over 300 published works and principal investigator for over $12M in research grants from the National Institutes of Health. He currently serves as a principal investigator for a National Cancer Institute-funded research grant studying how artificial intelligence can streamline the interpretation of CT scans of the chest, abdomen, and pelvis. Other areas of focus include the contributions of perceptual variations to radiologist performance in volumetric image interpretation and effective leadership and management in radiology and healthcare. In support of the latter focus, he is an avid mentor for radiology leaders and has developed and taught several national leadership training programs for the Radiology Leadership Institute of the American College of Radiology, where he has served as a founding Board Member since 2012. He is also the host of the widely acclaimed RLI podcast, "Taking the Lead," which profiles the personal journeys of radiology leaders. The more than 60 episodes released to date have been downloaded over 85,000 times.

He attained Bachelor of Science degrees with honors in chemistry and biology at the California Institute of Technology, a Medical Degree from the University of California at San Diego, and a radiology residency and fellowship at Stanford University. He co-founded Trivascular Inc and Informatics in Context and has served as an advisor and consultant to more than 20 medical technology companies.
