

2020 SRS Needs Assessment

September 2, 2020

Background and Objectives

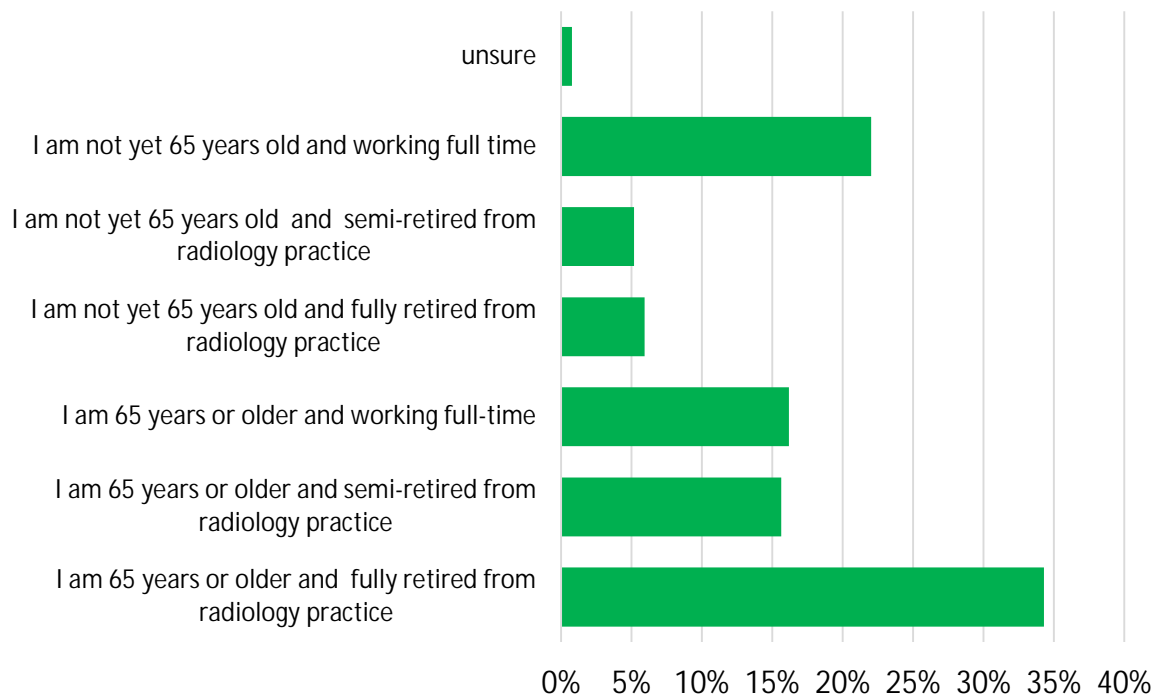

The ACR established the Senior and/or Retired Section of Membership (SRS) in 2015. The mission was determined as, “The mission of the Senior and/or Retired section is to enhance the experience of senior (over 65 and/or retired) members in the ACR by promoting fellowship and interaction amongst the members; communicating opportunities for continued professional involvement including mentorship, career transition and leadership training with other groups in the ACR; enhancing retirement opportunities such as service, financial planning, and recreation; and encouraging members to be ambassadors of the ACR to fellow physicians, health care organizations, and patients.”

A feedback survey was sent to 3,000 ACR members aged 60 and over to better understand the needs and desires of its constituent group as we refine the program moving forward.

The return rate on the survey was 34%

1. Which of the following best describes you?

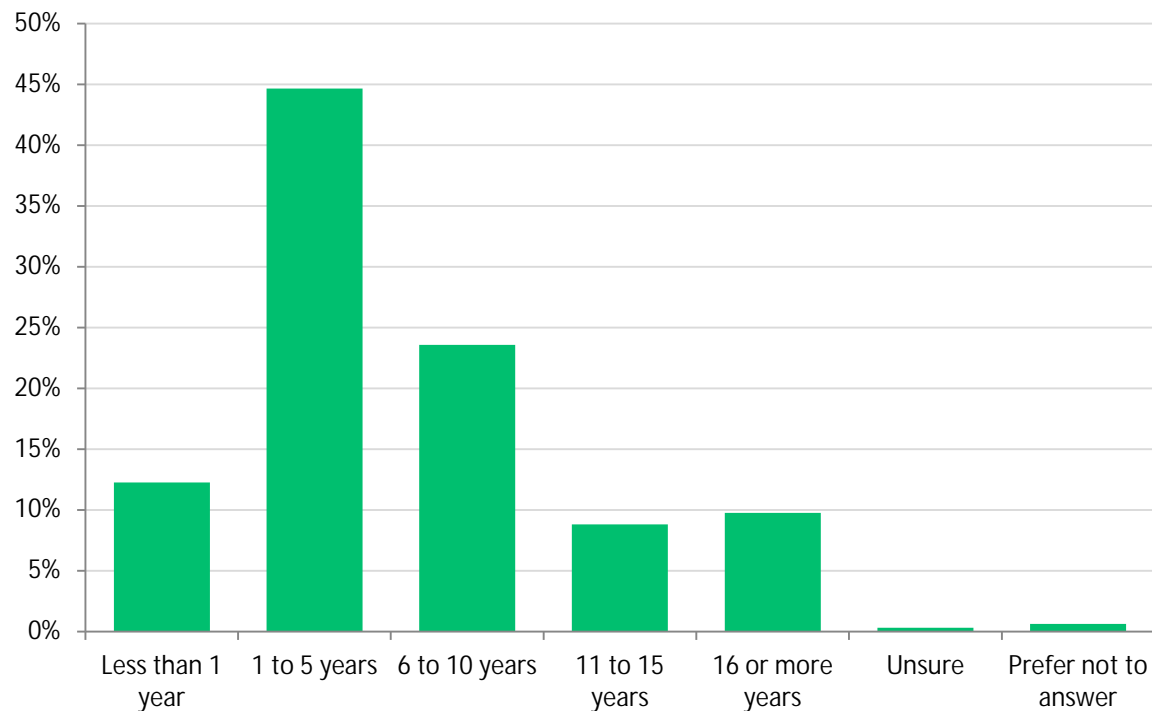

Which of the following best describes you?

BASE: All respondents

2. How long have you been fully retired?

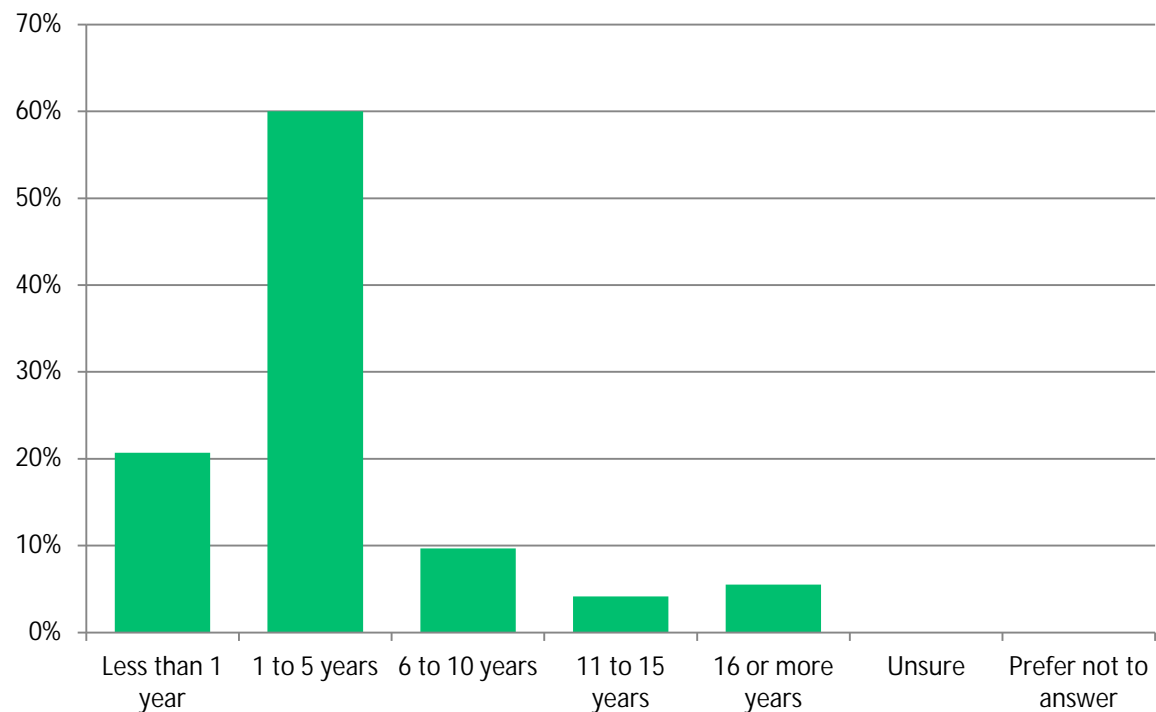

How long have you been fully retired?

BASE: 65+ and fully retired
